Client OAuth Settings

☒ Client OAuth Login
Enables the standard OAuth client token flow. Secure your application and prevent abuse by locking down which token redirect URIs are allowed with the options below. Disable globally if not used. (?)

☒ Web OAuth Login
Enables web-based OAuth client login. (?) ☐ Force Web OAuth Reauthentication
When on, prompts people to enter their Facebook password in order to log in on the web. (?)

☐ Embedded Browser OAuth Login
Enables browser control redirect uri for OAuth client login. (?) ☐ Use Strict Mode for Redirect URIs
Only allow redirects that use the Facebook SDK or that exactly match the Valid OAuth Redirect URIs. Strongly recommended. (?)

Valid OAuth redirect URIs

<http://localhost:8080/>

☐ Login from Devices
Enables the OAuth client login flow for devices like a smart TV. (?)
